2. Treating or massaging any part of the body internally or externally with an irritant, counter-irritant, or other substance to temporarily straighten a weak back or loin, or to produce unnatural animation.
3. Minimizing the effects of cramping by feeding or injecting drugs, depressants or applying packs or using artificial contrivance or therapeutic treatment exempting normal exercise.
4. Striking the animal to cause swelling in a depressed area.
5. Surgery of any kind performed to change the natural process or growth, maturation, contour or appearance of any animal, to include teeth. Not included is removal of teats or horns, clipping and dressing of hair and trimming of hooves.
6. Insertion of foreign material under the skin.
7. Any attempt to change natural color of an animal, either purebred or crossbred, by changing the color or adding false hair, fleece or skin at any point, spot or area of the animal's body.
8. The use of alcoholic beverages in the feed or administered as a drench.
9. Administration of drugs of any kind or description, internally or externally prior to entering the show ring, except for treating a recognized disease or injury and for the tranquilization of bulls that may otherwise be dangerous to females in heat.
10. Balancing the udder by any abnormal means including the use of a mechanical contrivance or the injection of fluid or drugs.
11. Treating or massaging the udder or its attachments with an irritant or counterirritant. The use of common products such as fly spray, ointment or liniment in excess to the extent that irritation is included as an irritant unless required to reduce edema at the time of calving.
